

BLS 3000 SERIES

REUSABLE FULL FACE MASKS WITH UNIVERSAL CONNECTION RD40

BLS 3000 series reusable full face masks are available with EPDM face seal. They are characterized by the high protection factor provided when used in combination with standard threaded filters EN148-1 (BLS 400 series) which protect against gas/vapors and toxic particulates.

UNIVERSAL CONNECTION

Standard thread connection according to EN 148-1, universal among all respiratory protection devices.

GLASS VISOR

It is a safety glass laminated with an EVA anti-fragmentation film which holds the pieces together if shattered. It gives a strong resistance against chemicals.

ANTI-FOG SYSTEM

Designed to avoid fogging on the visor through the control of the cold and hot air flows inside the mask instead of using surface treatments that can be easily spoiled.

FACE SEAL

Available in EPDM with FDA certification for a higher safety.
